standard

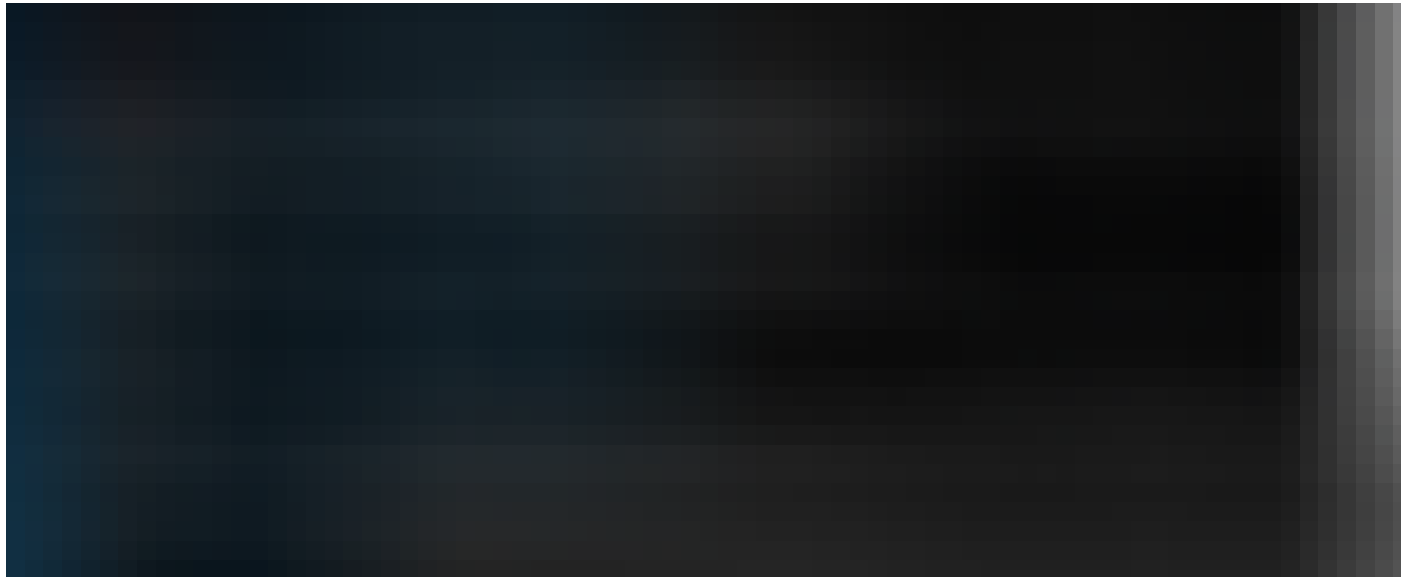

```
gobuster -u http://TARGET_IP:PORT -w  
/usr/share/wordlists/dirbuster/directory-list-lowercase-2.3-  
medium.txt -t 100  
  
-t for threads can go as high as 200  
-s "200,204,301,302,307,404" errors to look for you can edit these  
-w medium or small  
-x extentions aspx asp php.  
-fw force wild card
```

Burp Proxy User Agent (certain browser Sufarri, FireFox, Chrome, IE).

```
gobuster -u http://localhost:3000 -w  
/usr/share/wordlists/dirbuster/directory-list-lowercase-2.3-  
medium.txt -t 39
```

```
gobuster -u http://target:port -a 'agent' -w wordlists -t 100
```

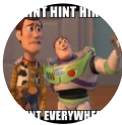

Adding multiple extensions

```
-x .php, .aspx, .asp
```

WORDLIST

```
/usr/share/wordlists/dirbuster/dirty_cheater
```
