OSX security related tools

1. [OSX collector](#) - for forensic analysis
2. [OSX auditor](#) - for forensic analysis
3. [MIDAS](#) - Mac Intrusion Detection Analysis System
4. [Santa](#) - binary whitelisting/blacklisting system
5. [Masochist](#) - framework for creating XNU based rootkits
6. [Class-dump](#) - command-line utility to dump Objective-C runtime information
7. [Mach inject](#) - Inter process code injection for MacOS
8. [Task vaccine](#) - similar to mach inject
9. [Hopper](#) - Hopper disassembler (not free)
10. [Mach-O diff](#) - mach-o diffing tool
11. [Mac4n6](#) - A collection of OS X and iOS forensic artifacts
12. [XGuardian scanner](#) - Security Scanner for OSX
13. [Crashwalk](#)
14. [PassiveFuzzFrameworks](#)
15. [osquery](#) - cross-platform tool for data collection and forensic analysis
16. [stronghold](#) - Easily configure MacOS security settings from the terminal.
17. [BlockBlock](#) - BlockBlock continually monitors common persistence locations and displays an alert whenever a persistent component is added to the OS.

18. [Dylib Hijack Scanner](#) - Simple utility that will scan your computer for applications that are either susceptible to dylib hijacking or have been hijacked.
19. [KextViewer](#) - View all modules on that are loaded in the OS kernel.
20. [KnockKnock](#) - See what's persistently installed on your Mac.
21. [LinkLiar](#) - Link-Layer MAC spoofing GUI for macOS.
22. [LockDown](#) - Open-source tool for El Capitan that audits and remediates security configuration settings.
23. [MalwareBytes](#) - Malwarebytes crushes the growing threat of Mac malware, so you are protected and your machine keeps running silky smooth. Cybersecurity smart enough for the Mac.
24. [OverSight](#) - Monitor mic and webcam, alerting you when the internal mic is activated, or whenever a process accesses the webcam.
25. [RansomWhere?](#) - Ransomware Detection.
26. [TaskExplorer](#) - Explore all processes running on your Mac with TaskExplorer.
27. [What's Your Sign?](#) - Adds menu item to Finder.app to display the cryptographic signing information for any file.
28. [FSMonitor](#) - Monitor all changes in the file system

iOS security related tools

A collection of ios security related resources

1. [IDB](#) - iOS App Security Assessment Tool
2. [iRET](#) - iOS Reverse Engineering Toolkit
3. [DVIA](#) - Damn Vulnerable iOS App for learning
4. [LibiMobileDevice](#) - A cross-platform protocol library to communicate with iOS devices
5. [Needle](#) - iOS App Pentesting Tool

iOS Jailbreaks

Jailbreaking resources

1. [PhoenixPwn](#) - Jailbreak for 9.3.5 32-bit devices.
