What Is Google Hacking?

Google hacking the best and widely used trick by hackers all around the world and they basically use Google search engine and search a particular query but these queries are not simple queries but these are some **special types of queries which are called Google Dorks** and every year or time to time these queries are increasing.

Use Google To Find Anything

Google is everywhere and but today most of us search on Google with simple keywords which is for basic users. if you think you are a modern and advanced user then you should know few google search hacks that will change your whole googling experience.

So welcome back to [GtechXp](#) and let's start.

Friends, you might know that Google search engine is the most used search engine in the world and hence from past to present Google has changed its algorithm to provide the best possible search result to the users of Google search.

As Google popularity increases the traffic on [Google.com](#) domain started increasing and every day millions to billions of peoples started searching on Google, as a result, Google struggles to show the relevant result to the end user and then google dorks comes in the game.

To counter this problem Google introduced a few smart yet powerful Dorks to search on Google. Google Dorks is basically an advanced way to use [Google.com](#) search engine with that you can get an exact result of your search on Google search engine.

How To Use Google Dorks?

There are a numbers of Google dorks are available and are fully legal because Google itself released those dorks from time to time for an advanced search user and people also know this process as Google hacking.

Who Can Use Google Dorks?

The answer is anyone, if you want to search a specific URL or title then you can use 'inurl:your URL name" and "intitle:your title name" respectively to find the exactly specific URL or title on Google search. (They are basic dorks)

Some of Google Dorks can be used by anyone but there are a lot of crazy Dorks are available and they are used by hackers to find any website in-depth details such as email addresses, login details, website vulnerability, secret files and even using dorks hackers can find out the details of debit/credit cards and other payments details very easily.

Some Example Of Google Dorks

- intitle:your title
- inurl:your url

Same way you can use these Google Dorks too.
