EDGE IS POWER

GE IS POWER, POWER TO THE PEOPLE,

GOOGLE-FOO

```
link:url Shows other pages with links to that url.
related:url same as "what's related" on serps.
site:domain restricts search results to the given domain.
define:word provides a definition of the word.
allinurl: shows only pages with all terms in the url.
inurl: like allinurl, but only for the next query word.
allintitle: shows only results with terms in title.
intitle: similar to allintitle, but only for the next word.
"intitle:webmasterworld google" finds only pages with
webmasterworld in the title, and google anywhere on the page.
cache:url will show the Google version of the passed url.
info:url will show a page containing links to related searches,
backlinks, and pages containing the url. This is the same as
typing the url into the search box.
spell: will spell check your query and search for it.
stocks: will lookup the search query in a stock index.
filetype: will restrict searches to that filetype. "-
filetype:doc" to remove Microsoft word files.
daterange: is supported in Julian date format only. 2452384 is
an example of a Julian date.
maps: If you enter a street address, a link to Yahoo Maps and to
MapBlast will be presented.
phone: enter anything that looks like a phone number to have a
name and address displayed. Same is true for something that
looks like an address (include a name and zip code)
site:www.somesite.net "+www.somesite.+net"
(tells you how many pages of your site are indexed by google)
allintext: searches only within text of pages, but not in the
links or page title
allinlinks: searches only within links, not text or title
```

```
Look in documents for string: filetype:rtf | filetype:ppt |
filetype:pptx | filetype:csv | filetype:xls | filetype:xlsx |
filetype:docx | filetype:doc | filetype:pdf "this document is
