Bookmark	Description
Toolkit B.D.	This bookmarklet allows you to access and use a range of bookmarklets in a single options menu from your web browser without the need to install each bookmark individually or returning to the Toolkit.
All Images	This bookmarklet extracts all images that contain external links on the current page and displays them in a new window.
Cluster Search	This bookmarklet will conduct a cluster search on the word / phrase specified and will group

returned data into thematic categories. N.B. replaces current window when used.

Display All Links	This bookmarklet will extract all external links on the current webpage and display them in a new window.
Facebook (FB) Search	This bookmarklet will replace the current window and search Facebook (FB) for the word or phrase specified. N.B. Being logged into a FB account prior to use will achieve the best results.
FB ID	This bookmarklet will display the FB ID number of the user's profile you are currently viewing. N.B. You must refresh the Facebook page (F5) prior to using it.
FB Comment Expander	This bookmarklet will expand every comments section, on the user's profile you are currently viewing, to show hidden comments and, where applicable, will automatically translate all comments to English.
FB Picture link downloader	This bookmarklet will review a user's Facebook account and display all their photos as links in a separate window for easy downloading. N.B. You must be logged into Facebook and viewing the user's photos page for the bookmarklet to work.
Your Facebook History	This bookmarklet will display your Facebook account history and outline who you have searched for, their current city (if applicable) and their Facebook ID.
Find on this Page	This bookmarklet will search the current page for the word or phrase specified. If found, every occurrence will be highlighted yellow and a outline of how many times the word or phrase was found will be displayed.

Int / Ext Links	This bookmarklet will colour links on the current page one of three colours depending on their attributes; Red for internal links, Blue for external links and Orange for in-page links.
Last Modified	This bookmarklet finds the last modified date of the current webpage. N.B. if a webpage is dynamic, this bookmarklet will show the current date and time.
List Email Links	This bookmarklet will outline any email addresses prefixed with a 'mailto tag' on the current webpage and display this information in a new window.
Search Google Cache	This bookmarklet will search Google Cache for the website specified. N.B. replaces current window when used.
Search Internet Archive	This bookmarklet will search the Internet Archive for the website specified. N.B. replaces current window when used.
Search Links	This bookmarklet will search all the links on the current page for the word or phrase specified and will list, if applicable, any results in a new window. N.B. This bookmarklet searches both the link text and target URL for any matches.
Search Popular Social Media	This bookmarklet will search a range of popular social media sites, via a CSE, for the word or phrase specified. N.B. replaces current window when used.
Search Twitter	This bookmarklet will search Twitter for the word or phrase specified. N.B. replaces current window when used.
Twitter Analytics (keyword)	This bookmarklet will provide analytical data (followers, location data, user information, etc) on all

	tweets featuring the word or phrase specified. N.B. replaces current window when used.
Twitter Analytics (username)	This bookmarklet will provide analytical data (followers, location data, user information, etc) for the user account specified. N.B. replaces current window when used.
Translate to English	This bookmark will translate the current webpage to English. N.B. replaces current window when used.
View Selection	This bookmarklet copies any selected text into a new window. N.B. It preserves links, paragraphs and images.
Website Information Search	This bookmarklet displays a range of information about the website specified, including IP addresses / Subdomains used by the website. N.B. replaces current window when used.
Reverse Whois Search	This bookmarklet checks for information relating to the name, address, telephone number, email, etc of the website specified. N.B. replaces current window when used.
Word Frequency	This bookmarklet will count all the text on the current webpage and will display, in a new window, how many times each word features.
Youtube Video Downloader	This bookmarklet will download any Youtube video into a storyboard format. N.B. You should select the Youtube video you want to download prior to using this bookmarklet. There is no requirement to watch the video you want to download.
