WPA/WPA2-ENTERPRISE Best Practice Guide

09 Aug 2018 • Wifi Pentesting

1) **Policy**: – Before we start designing our network or create our corporate policy we need to make sure some key things in mind:

• **Policies on using WLAN**: - First we need to outline appropriate and inappropriate use of WLAN environment and possible outcome for noncompliance. We also need to have an End-User agreement which user should sign and agree upon all the policies for wireless use. And we have to create and mention all the policies like what services a user is permitted to do, Policies on (VPN) and Hot-spot use of the internet access.
