Infosec_Reference

🐢 An Information Security Reference That Doesn't Suck 🐢

Goal:

- Be an awesome Information Security Reference ✅
- List of techinques, tools and tactics to learn from/reference. ✅
- Rich resource of infosec knowledge for anyone to browse through as a jumping off point for various niches OR as a reference/recall method for stuff.
    - Something like a "Yellow Pages" in the sense of you know something exists, but what was it called....
    - 'if you give a man a fish he is hungry again in an hour. If you teach him to catch a fish you do him a good turn.'

- Always accepting more links/stuff. Feel free to make a pull request or complaint.

Why Do *You* Care?

- Don't have to constantly google for tools/reminder.
- Easily browsable list of tools, techniques, papers, and research in all sorts of areas.
- Want to read some good info.

Why Do *I* Care?

- I do this as a resource for myself(to teach others from) and offer it publicly as a way of giving back to the general community.
- To be clear, these aren't personal notes. I keep this repo maintained as a way of having pointers to information that I feel help build someone's skillset or increase understanding of attacks/methods/defenses.

This page

- This page isn't the best ~~terrible~~ on mobile. Use https://rmusser.net/docs for better mobile formatting.
  - At some point I will sort the sections into a grid alphabetically.
- For latest content updates, check here: Things added since last update
  - This will have all links added to the other pages sorted according to topic, making it easier to see new stuff.
- All links on this page should work. Last tested 3/3
- Contributions are welcome, format is pretty simple/easy to pick up, add anything not already in it that fits.

Index - Table of Contents

Infosec_Reference

- Malware
- Network Attacks & Defense
- Network Security Monitoring & Logging
- Open Source Intelligence Gathering - OSINT
- Passwords
- 🐟 Phishing 🐟
- Physical Security
- Privilege Escalation and Post-Exploitation
- AppSec/Programming Stuff
- Rants & Writeups
- 🏮 Red Teaming/Penetration Testing Stuff 🏮
- Reverse Engineering
- REMATH Reverse Engineering
- Rootkits
- Social Engineering
- 🔩 System Internals (Linux/Windows) - NOT THE TOOLSET 🔩
- Threat Modeling
- UI/UX Design
- 🌻 Web 🌻
- 📊 Wireless Networks and RF Devices 📊
- Notable Policy Docs
  - Insurance Data Security Model Law |
  - NIST Cyber Security Framework 02/12/2014 |
  - PCI-DSS V3.2|
