filetype:htaccess

Find htaccess files

```
# BEGIN WordPress
<IfModule mod_rewrite.c>
RewriteEngine On
RewriteBase /
RewriteRule ^index\.php$ - [L]
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_FILENAME} !-d
RewriteRule . /index.php [L]
</IfModule>
# END WordPress
```

FILETYPE PARAMETER :

filetype:htaccess

A .htaccess (hypertext access) file is a directory-level configuration file supported by several web servers, used for configuration of site-access issues, such as URL redirection, URL shortening, Access-security control (for different webpages and files), and more. A site could have more than one .htaccess file, and the files are placed inside the web tree (i.e. inside directories and their sub-directories), and hence their other name distributed configuration files.

.htaccess files act as a subset of the server's global configuration file (like httpd.conf[2]) for the directory that they are in, or all sub-directories. The original purpose of .htaccess—reflected in its name—was to allow per-directory access control by, for example, requiring a password to access the content. More commonly, however, the .htaccess files define or override many other configuration settings such as content type, character set, CGI handlers, etc.

filetype:asp intitle:" Microsoft Outlook Web Access"

Get access to "Microsoft Outlook Web Access" Panels :

filetype:asp intitle:" Microsoft Outlook Web Access"

About Microsoft Outlook Web Access :

Outlook on the web, previously called Exchange Web Connect, Outlook Web Access, and Outlook Web App in Office 365 and Exchange Server 2013) is a suite of Outlook web apps from Microsoft. It spans across Office 365, Outlook.com, Exchange Server, and Exchange Online. It includes a web-based email client, a calendaring tool, a contact manager, and a task manager. As of November 2015, Microsoft is in process of upgrading Outlook.com to Outlook

on the web and the Office 365 infrastructure through the Outlook.com Preview It also includes add-in integrations, Skype on the web, and alerts as well as new themes that span across all the web apps. Ootw is navigated using the App Launcher icon which brings down a list of web apps for the user to choose from.
